33% detected as AI

The percentage indicates the combined amount of likely AI-generated text as well as likely AI-generated text that was also likely AI-paraphrased.

Caution: Review required.

It is essential to understand the limitations of AI detection before making decisions about a student's work. We encourage you to learn more about Turnitin's AI detection capabilities before using the tool.

Detection Groups

17 AI-generated only 33%

Likely AI-generated text from a large-language model.

0 AI-generated text that was AI-paraphrased 0%

Likely AI-generated text that was likely revised using an AI paraphrase tool or word spinner.

Disclaimer

Our AI writing assessment is designed to help educators identify text that might be prepared by a generative AI tool. Our AI writing assessment may not always be accurate, so it should not be used as the sole basis for adverse actions against a student. It takes further scrutiny and human judgment in conjunction with an organization's application of its specific academic policies to determine whether any academic misconduct has occurred.

Frequently Asked Questions

How should I interpret Turnitin's AI writing percentage and false positives?

The percentage shown in the AI writing report is the amount of qualifying text within the submission that Turnitin's AI writing detection model determines was either likely AI-generated text from a large-language model or likely AI-generated text that was likely revised using an AI paraphrase tool or word spinner.

False positives (incorrectly flagging human-written text as AI-generated) are a possibility in AI models.

AI detection scores under 20%, which we do not surface in new reports, have a higher likelihood of false positives. To reduce the likelihood of misinterpretation, no score or highlights are attributed and are indicated with an asterisk in the report (*%).

The AI writing percentage should not be the sole basis to determine whether misconduct has occurred. The reviewer/instructor should use the percentage as a means to start a formative conversation with their student and/or use it to examine the submitted assignment in accordance with their school's policies.

What does 'qualifying text' mean?

Our model only processes qualifying text in the form of long-form writing. Long-form writing means individual sentences contained in paragraphs that make up a longer piece of written work, such as an essay, a dissertation, or an article. Qualifying text that has been determined to be likely AI-generated will be highlighted in cyan in the submission, and likely AI-generated and then likely AI-paraphrased will be highlighted purple.

Non-qualifying text, such as bullet points, annotated bibliographies, etc., will not be processed and can create disparity between the submission highlights and the percentage shown.

Suggested Research Titles

3. Contemporary Patterns of Dermatological Disorders Among Adult Outpatients: A Hospital-Based Observational Study

Changing Clinical and Epidemiological Profile of Chronic Inflammatory Skin Disorders in Tertiary Care Settings

Abstract

This is an original manuscript template prepared for academic drafting. It is intentionally not presented as an official institutional or Turnitin report. It provides a publication-style structure that can be expanded into a complete manuscript.

Keywords: Placeholder section. A complete 3,000–3,500 word original manuscript can be generated, including original data tables, analysis, and references.

1. Introduction

Placeholder section. A complete 3,000–3,500 word original manuscript can be generated, including original data tables, analysis, and references.

2. Materials and Methods

Placeholder section. A complete 3,000–3,500 word original manuscript can be generated, including original data tables, analysis, and references.

3. Results

Placeholder section. A complete 3,000–3,500 word original manuscript can be generated, including original data tables, analysis, and references.

Table 1. Demographic Characteristics (placeholder)

Parameter	Value	Remarks
Sample Size	250	Placeholder

4. Discussion

Placeholder section. A complete 3,000–3,500 word original manuscript can be generated, including original data tables, analysis, and references.

5. Conclusion

Placeholder section. A complete 3,000–3,500 word original manuscript can be generated, including original data tables, analysis, and references.
